

IMPORTANT BILL PAY UPDATE

We are pleased to announce the upcoming upgrade of our online bill pay service. Based on input from you, our valued customers, we enhanced our online bill pay functionality to improve your experience in addition to providing the top notch security and speed to which you are accustomed.

Our goals were simple, make it easy-to-use and give you more control of your finances. The new online bill pay tool does just that. Not only is the system intuitive and efficient, it also includes new tools that make your financial planning more efficient.

The new "HUB" page will be the convenient launch point for all of your bill pay activities, including: adding payees, making payments, checking scheduled payments and viewing reminders and eBills.

Use the new calendar view to help plan bill payments.

Reminders & eBills help prioritize your bill pay activities at-a-glance.

See your scheduled payments on the HUB for easy reference.

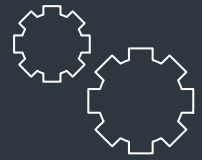

Adding a payee has never been easier; now you can quickly add personal and company payees from the HUB.

New "floating footer" keeps your running total amount and offers quick access to "Schedule" payments.

HUB-CENTRIC

On the new, easy-to-use HUB page, you can access all of your primary bill pay activities in one location.

NEW PLANNING TOOLS

Use the new calendar feature to help plan bill payments. Click to view full calendar and see past, pending and future payment detail for the month.

PUT THE CONTROL IN YOUR HANDS

Reminders and scheduled payments are displayed on the HUB page so you can prioritize and manage your bill pay activities at-a-glance.

HELPING YOU DO YOUR PART

Do your part to help the environment and create a paper trail without the paper by paying bills online.

There's no question that paying bills online saves you time and money, all while helping you do your part to Go Green. The added features and enhancements of the new bill pay service, coming this fall, will make the experience even better. Stay alert for more details on the upgrade date.
